

Rexnord® Magnetflex® Tubular Corner Return

Non Marking return for Plastic TableTop Chains & Chainbelts

The Rexnord® Magnetflex® system has become the worldwide standard in the beverage industry. The great advantages of this system have made it the choice of the worlds leading OEM's. Magnets underneath the track hold the chain down in a reliable way.

With todays high speed conveyor applications and sometimes also abrasive conditions, it is required that the chain surface remains in optimum condition to avoid any unwanted product handling issues. On some occasions we found that abrasive parts cause unwanted wear of the chain surface. To ensure the

chain surface of plastic TableTop chains remain in perfect condition in high speed and abrasive applications, Rexnord has developed a special Non Marking return section to be combined with the standard Magnetflex upper part. This new returnpart features a Stainless Steel tubular return which reduces abrasive wear of the chain topsurface.

The result is that the chain surface will remain in perfect condition over a long period of time, and optimum product handling at high speeds can be achieved.

Features & Benefits

- Designed to eliminate marks on the conveying surface of the chain caused by the curve return, typically in abrasive and high speed applications.
- Solution is a metal tubular return where no debris can embed and chain surface is protected.
- Chain surface remains in optimum condition, avoiding bottle stability issues.
- Machined guideshoe is not recommend in combination with Non Marking return.
- Available as standard in the following executions:

Combi-A C6T

Suitable for Plastic TableTop range RHMP & RHMDP

Combi-A CB6T

Suitable for Chainbelt series FGM1050 and FTM1060

Combi-A CC6T

Suitable for Heavy Duty Chainbelt FTM1055

- Available upon request for any other corner track execution
- Suitable for Plastic TableTop chain and Plastic Chainbelts only

Marking on surface of the chain in abrasive applications

Optimum combination with infeed roller

Single track version

Multiple track version
