

Product Upgrade

Improved SH 325 series

Rexnord FlatTop continuously develops and introduces new products for conveyors. Our current offering in the Rex[®], MCC[®] and Marbett[®] product lines is frequently reviewed to ensure that our products continue to give the best fit to the needs of our customers and to provide the best value.

As a part of this process we have decided to improve SH 325 series chains by equipping them with the same pin used in the Rexnord 820 Series TableTop[®] chains.

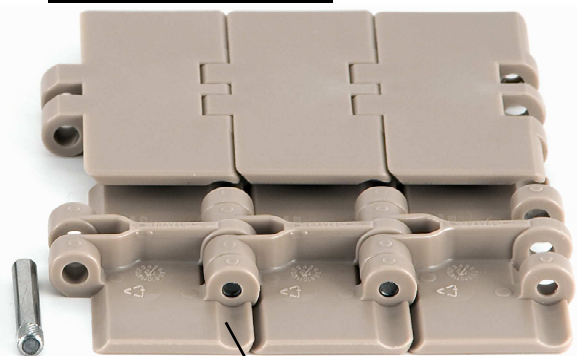

SH325 Classic design

Classic Hole

Cylindrical knurl type

SH325 New design

Blind Hole

Helical knurl type

Description & Code Numbers:

Following chain type are included in this upgrade.

Chain Type	Code Nr.	Chain width		Weight
		mm	inch	Kg/m
SH325HP	750.10.20	82.5	3.25	0.82
SH325PS	750.10.03	82.5	3.25	0.82
SH325XR	750.43.31	82.5	3.25	0.82
SH325XL	750.42.31	82.5	3.25	0.82

All descriptions and code numbers remain the same.

Interchangeability:

Old and new chains can be coupled, but please make sure to only use new design pins with new design links and old design pins with old design links. Old and new design will run on the same sprockets and tracks. The new design will result in better performance at high working loads, all the other characteristics remain the same.

Planning:

The "old version" with cylindrical knurl pins will continue to be produced until the end of January 2011. Starting February, the new version will be provided with new helical knurl pins.

Pricing and Delivery

Pricing and delivery will remain the same.

If you have a question regarding this topic, please contact your local Technical Support representative.

January 2011, Rexnord FlatTop Europe
